		Page:	1 of 2

1. Purpose

The purpose of this study is to evaluate if a material or chemical will cause local irritation in the skin, mucosal, or ocular tissues.

2. Testing Guidelines

2.1. Based on the requirements of the International Organization for Standardization 10993-10, Biological evaluation of medical devices – Part 10: Tests for irritation and skin sensitization.

- The test article extracts are dosed, or the test article is directly applied to the animal. The dosed sites will be examined and scored at 24 ± 2, 48 ± 2, and 72 ± 2 hours after treatment. The scoring will measure the irritation reaction (erythema and edema) to a single, repeated, or continual exposure from device materials or chemicals.

3. GLP Compliance

Good Laboratory Practice – This nonclinical laboratory study will be conducted in accordance with the United States Food and Drug Administration Good Laboratory Practice Regulations, 21 CFR Part 58.

4. Identification of Test and Control Articles

4.1. Test Article

The sponsor, <company name> will submit the test articles, <trade name>, to be evaluated.

4.2. Control Articles

5. Test system

5.1. Test System and Justification

5.2. Test System Management

6. Method

6.1. Test Article Preparation

6.2. Control Article Preparation

6.3. Extract Observation

6.4. Test Procedure

Template Number: xxx-xxxx-xx Rev A	Printed copies are considered UNCONTROLLED documents after the date printed. Printed on December 4, 2024 CONFIDENTIAL- PROPRIETARY INFORMATION – Company Name

7. Evaluation and Statistical Analysis

8. Report

9. Quality Assurance

Inspection will be conducted at intervals adequate to assure the integrity of the study in conformance with 21 CFR 58.35(b)(3). The final report will also be reviewed for conformance to Section 58.185, subpart J, of the GLP Regulations.
